Did you know...

That our own **Jen Moser** is celebrating **15 years** with District III this month! Jen grew up in Clearwater, NE and received her bachelor's degree from the University of Nebraska at Kearney. In addition to taking care of the APEX and administrative duties for us, she enjoys attending her children's activities and cheering on **Nebraska – Go Big Red!** We appreciate Jen's service and dedication to our District III membership and partners.

NOTE: Data Center Presentation Coming Up

District III is excited to announce that we will welcome Scott Sandal of DataVator, Inc. (DVI2) to our Committee meeting on January 27th at 3:00 P.M. in Mitchell. He will be presenting unbiased, general information regarding the different types and sizes of data centers as well as water and energy requirements – "things to consider" when working on land use regulations and making decisions for your area. We look forward to seeing you there!

New & Improved!

The GIS team is working on transitioning our GIS websites to Esri's Experience Builder. This upgrade will deliver greater functionality, flexibility and customization across our county GIS resources. The new Experience Builder sites will include multiple maps and dedicated pages for each county department allowing them to showcase the GIS layers, information and resources most relevant to their work. One of the greatest advantages of the new platform is its high degree of customization. Each site can be tailored to the unique needs of the individual County. County departments will be able to request specific features and functionality. Together, we can create GIS websites that are more informative, user-friendly and better aligned with individual County needs.

Planning & Development District III is grateful for its members and partners.
We wish you a ***HAPPY THANKSGIVING!***
